Summary

Senior Mobile Engineer with 12+ years of experience shipping commercial products across the **Game Development** (Unity, C#) and **Enterprise Mobile** (Android, React Native) landscapes. Uniquely positioned at the intersection of **Product Engineering** and **Platform Infrastructure**, transitioned from building gameplay features to architecting the CI/CD pipelines and tools that empower engineering teams.

Candidate Relevance: Mobile Platform Engineering

- **Stakeholder Empathy:** 10+ years of Indie & AA Game Development ensures a deep understanding of the "Customer" (Game Developers) and their friction points in the development loop.
- **Pipeline Automation:** Expertise in **CI/CD design (GitHub Actions)**, automating build-test-deploy workflows.
- **Backend & Scripting:** Proficient in backend scripting and **Server-Authoritative** backend architecture, ensuring robust integration between game clients and platform services.
