Summary

Senior Mobile Engineer with 12+ years of experience shipping high-impact commercial products across the enterprise mobile (Android, iOS, React Native) landscapes. Uniquely positioned at the intersection of product engineering and platform infrastructure, I successfully transitioned from engineering rich gameplay features to architecting scalable native and multiplatform mobile applications, robust CI/CD pipelines, and internal tools that empower engineering teams.

Professional Experience

VGW (Senior Mobile Engineer | Game Lifecycle & CI/CD Specialist)

2024 – 2026 | Remote

- **Greenfield Product Delivery:** Spearheaded the architecture and development of a multibrand React Native application, successfully leading the project from initial concept to market release.
- **Mobile Ecosystem & Telemetry:** Engineered In-App Purchase workflows and integrated Amplitude/AppsFlyer SDKs to establish robust data pipelines and seamless monetization.
- **DevOps & Platform Automation:** Architected comprehensive GitHub Actions CI/CD pipelines and internal tooling, significantly reducing manual overhead and empowering cross-functional teams to self-serve builds.
- **Cross-Functional Leadership:** Coordinated closely with QA, Product, and Design teams to align technical roadmaps and guarantee predictable feature delivery.

Tech: GitHub Actions CI, React Native, Android, iOS, Unity, Agile Leadership

OKE (Native Android Developer)

2022 – 2024 | Remote

- **High-Scale Application Maintenance:** Maintained and evolved a portfolio of over 7 native Canal+ Android applications, ensuring platform stability and seamless feature delivery for hundreds of thousands of active users.
- **Tech:** Kotlin, Android Native

Independent Game Developer

2011 – 2025 | Self Employment

- **Cross-Engine Architecture:** Shipped production apps across diverse tech stacks including Unity (C#), LibGDX (Java), and Haxe/OpenFL, demonstrating deep adaptability to different build systems and compilation pipelines.
- **Full-Stack Systems Engineering:** Architected and maintained live-service platforms using Beamable and MongoDB. Designed scalable data models, implemented server-side logic for real-time user state, and managed cloud infrastructure to support continuous service delivery.
- **Release Management:** Solely responsible for App Store & Google Play certification, navigating complex compliance requirements, provisioning profiles, and release gating for iOS and Android.

Tech: C#, Unity, MongoDB, Haxe, LibGDX, Java, App Store Connect API, Google Play Console, Python Scripting

Gamesture (*Lead Unity Developer*)

2020 – 2022 | Remote
